Frequently Asked Questions

Learn more about using WhatsApp Widget for messaging with your customers

What is a WhatsApp Widget for my website?

Whatsapp Widget enables you to add the Whatsapp Click To Chat link to your website for free. The visitors of your website will be able to start a conversation with your business on Whatsapp by clicking on the widget. They will be taken to Whatsapp Web/Desktop and prompted to write a message to the Whatsapp number set by you.

Is using Whatsapp Widget free?

Yes, it’s completely free.

What Are The Advantages of WhatsApp Widget with Click to Chat Links?

Whatsapp chat with your customers makes your marketing and customer support functions more seamless for your customer. A WhatsApp Chat Link can help you collect your customers’ phone numbers, improving your lead generation and sales.

WhatsApp Links can create a predefined message for your website visitors to reach out to you with. This means that a customer doesn’t take any effort to engage with your business. The user clicking the link doesn’t even have to save your number. It’s the most fluid way to start chatting with customers.

The main benefit to using a click-to-chat Whatsapp widget is that a customer stays in conversation with your support or marketing team even if they leave your website. The conversation is still going on their Whatsapp.

How do I add a WhatsApp widget to my website?

Just fill in your Whatsapp phone number in the relevant field above, and customize the look and message of your Whatsapp widget. Then share the code with your developer, or insert it on your website before the closing </footer> tag.

That’s it! Your customers will be able to reach out to your business via Whatsapp.

Why do I need TimelinesAI WhatsApp widget?

According to [Whatsapp marketing success cases](#) published by Facebook, using Whatsapp:
